1. About the Company

1.1 Introduction

Wodio AI is a dynamic startup company founded in 2024 by Co-founders Mohammad Noshad and Morteza Noshad. Both co-founders bring a wealth of experience in SaaS platforms, specifically in artificial intelligence, to the table.

1.2 Location

Situated in the heart of Silicon Valley, Sunnyvale, CA, Wodio AI aims to revolutionize business operations with its innovative AI solutions.

2. Summary of the Solutions

Wodio AI offers a suite of AI-driven agents designed to streamline various business functions. The available agents are:

2.1 Question Answering Agent

Ideal for companies' internal question answering needs, this agent can handle queries related to policies, IT, HR, and more, ensuring employees receive accurate and timely information.

2.2 Customer Support Agent

Tailored for customer service, this agent can address a wide range of common inquiries, from technical to administrative and billing questions, thereby saving resources and enhancing customer satisfaction.

2.3 Voice Sales Agent

Designed to engage with prospects and leads via voice interactions, this agent helps convert them into customers by handling pre-sales calls efficiently.

2.4 Visual Sales Agent

Similar to the Voice Sales Agent but with enhanced multimedia capabilities, it can present slides and demos to prospects, making it perfect for pre-sales meetings.

2.5 Video Sharing Agent

This agent can play webinars, educational videos, and advertisements interactively, allowing viewers to ask questions and receive real-time responses while watching the video.

3. Summary of the Main Features (for all Agent Types)

The AI agents boast several advanced features:

3.1 Speech Recognition

Accurate and efficient recognition of spoken language.

3.2 Accurate Responses

Utilizes state-of-the-art LLM models fine-tuned for business applications and an advanced version of RAG for question answering using the knowledge base.

3.3 Text to Speech with Supernatural Voice

Converts text to speech in a natural-sounding voice.

3.4 Multimedia Presentation

Capable of presenting slides, PDFs, and other multimedia content.

3.5 Key Interaction Insights

Provides valuable insights such as conversion scores, call transcriptions, covered topics, and more.

4. Detailed Explanation of the Agents

4.1 Question Answering Agent

4.1.1 Use Cases

Ideal for internal company use, such as responding to employee queries about policies, IT issues, HR matters, etc.

4.1.2 Impact

1. Saves time for employees by providing quick access to needed resources.

2. Ensures high-quality responses from available references.

3. Reduces the need for human resources dedicated to answering queries.

4.1.3 How to Use

Integrate it into your website using an iframe code. Users can access the agent by clicking on the iframe.

4.2 Customer Support Agent

4.2.1 Use Cases

Perfect for handling customer support inquiries.

4.2.2 Impact

1. Saves time for the support team by automating responses.

2. Provides accurate answers from existing references.

3. Reduces the need for human resources in customer support.

4.2.3 How to Use

Embed the agent into your website using an iframe code. Users can interact with the agent by clicking on the iframe.

4.3 Voice Sales Agent

4.3.1 Use Cases

Suitable for pre-sales calls to engage potential customers.

4.3.2 Impact

1. Saves time for the sales team by automating pre-sales calls.

2. Collects valuable insights during interactions.

4.3.3 How to Use

Embed the agent into your website using an iframe code or share the agent link via social media or email campaigns.

4.4 Visual Sales Agent

4.4.1 Summary

Utilizes presentation slides and other references to conduct pre-sales meetings with leads.

4.4.2 Use Cases

Ideal for pre-sales calls.

4.4.3 Impact

1. Saves time for the sales team.

2. Can demo slides, schedule follow-up calls, and provide essential information to leads.

4.4.4 How to Use

Embed the agent into your website using an iframe code or share the agent link via social media or email campaigns.

4.4.5 Features

4.4.5.1 AI Lead Engagement Suite

- **Personalized Interaction**: Customizes conversations and shows content based on each user's interests and needs.

- **Objection Handling**: Effectively addresses and resolves any objections or concerns the prospect may have to keep the conversation moving forward.

- **Deal-focused Conversations**: Guides discussions strategically towards deal closure, maximizing conversion opportunities.

- **Follow-up Meeting Scheduling**: Seamlessly schedules follow-up meetings with the sales or technical team, ensuring leads are directed to the appropriate next steps.

- **Discovery and Qualification**

- **Accurate Responses to Queries**

- **Directing to Sign-up or Purchase Pages**: Guides leads to sign-up or purchase pages to facilitate quick and easy conversion.

- **Accurate and Adaptive Responses**: Delivers precise information based on provided references, supporting various reference types such as documents, slides, videos, and URLs.

4.4.5.2 Multimedia Interaction Capability

- **Real-time Voice Interactions**: Uses naturally synthesized voice to interact with leads in real-time, making the engagement more personal and dynamic.

- **Visual Material Presentations**: Combines voice interactions with visual presentations, including slide decks and videos, to enhance the engagement experience.

- **Interactive Content Delivery**: Presents visual materials in an interactive way, allowing for dynamic responses and adjustments based on the lead's reactions and questions.

- **Seamless Content Integration**: Integrates various types of multimedia content into the conversation flow, ensuring a cohesive and engaging presentation.

4.4.5.3 Post-Call Insights

- **Lead Optimization**: Provides detailed call logs, recordings, summaries, and insights, including a conversion score, to ensure no lead is overlooked and hot leads are quickly identified.

- **Interaction Analysis**: Analyzes interactions to understand why a prospect did not convert to a customer, providing valuable insights into user disinterest or unanswered queries based on the knowledge provided to the agent.

- **Actionable Recommendations**: Offers actionable recommendations based on the insights gathered from calls to improve future interactions and conversion strategies.

- **Follow-up Prioritization**: Identifies and prioritizes leads for follow-up based on their engagement level and potential for conversion, ensuring the most promising leads are addressed promptly.

- **Performance Metrics**: Tracks and reports key performance metrics, such as lead engagement rates and conversion ratios, to help refine sales strategies and measure the effectiveness of the AI agent.

5. References

5.1 What Type of References Can Be Uploaded?

Users can add references in two ways:

1. Upload files in PDF, PPTX, DOCX, TXT, and video formats like MP4.

2. Add URLs for the agent to crawl.

5.2 Limitations

There are currently no limitations on the length of references.

6. Impact

- Identifies hot leads three times faster than traditional methods, streamlining the sales process.

- Boosts conversion rates by 20%, increasing lead-to-customer conversions.

- Ensures 100% follow-up on leads, preventing potential opportunities from being missed.

- Lowers customer acquisition costs by 30%, optimizing the cost-efficiency of acquiring new customers.

7. Integrations

Wodio AI offers a wide range of integrations with a vast majority of CRM systems, ensuring seamless integration into your existing workflows.
